Members of the General Assembly
State of Missouri

Ladies and Gentlemen:

The State Board of Education herewith submits its One Hundred Thirty-Seventh Report of the Public Schools of the State of Missouri. This report, prepared in compliance with Section 161.092, Missouri Revised Statutes, covers the school year ending June 30, 1986.

We hope the information contained in this report will be of interest and assistance to you as you consider the needs and major problems of the public schools of the State of Missouri.

Respectfully,

Dan L. Blackwell

Dan L. Blackwell, D.D.S.
President, State Board
1985-86

Arthur L. Mallory
Commissioner of Education

Linda L. Ward
Secretary, State Board of Education

The State Board of Education was established in its present form by the Missouri Constitution of 1945. The State Board of Education consists of eight lay citizens appointed by the Governor with advice and consent of the Senate. Article IX, Section 2(a) also states that no more than four members of the Board may belong to the same political party. State Board members are appointed for eight-year terms which are arranged so that only one term expires each year. The Board elects its own officers.

The responsibilities of the State Board of Education extend from preschool through postsecondary and adult education programs. These responsibilities include:

- Establishment of policies for the leadership, service and regulation of public education. These policies are administered by the Missouri Department of Elementary and Secondary Education.
- Operation of the State School for the Blind and the State School for the Deaf.
- Operation of State Schools for Severely Handicapped Children.
- Classification of schools and certification of teachers.
- Administration of vocational education, vocational rehabilitation and veterans' education programs.
- Administration and supervision of programs under the Elementary and Secondary Education Act of 1965 and other federal programs.
- Apportionment of state moneys.
- Publication of laws relating to schools.
- Collection and publication of information which reflects continuously the condition and management of the state's public schools.

PART I. REPORT OF THE YEAR COMPLETED

The Year in Review

By Arthur L. Mallory
Commissioner of Education

The 1985-86 school year was a year when. . .

. . .the statewide effort to improve public education shifted into high gear, with state and local school officials taking the first important steps to implement major provisions of the Excellence in Education Act of 1985.

. . .as a result of action by the General Assembly, local school districts enjoyed a record increase in state funding through the Foundation Program.

. . .local schools broke new ground by launching the first, statewide, state-supported initiative to expand educational services for families and young children (birth to age 3). Nearly 16,000 families took part voluntarily in this pioneering program, and Missouri earned recognition as a national leader in the field of early childhood/parent education.

. . .academic performance of Missouri students continued to improve, according to scores on the American College Test and the Scholastic Aptitude Test.

. . .public schools took a giant step forward into the age of high technology by purchasing more than 7,000 new microcomputers. The number of computers available to students grew by at least 40 percent—a remarkable one-year gain.

. . .Missouri made an important contribution to the future of the teaching profession by awarding $2,000 scholarships to 210 outstanding prospective teachers. It was the first effort of its kind at the state level to encourage top-ranking students to pursue careers in education.

. . .nearly 1,200 principals and superintendents from Missouri public schools took part in workshops conducted by the Department of Education's "Leadership Academy," a new statewide program that is providing specialized leadership training for school administrators. Training offered during the Academy's premier year focused on how to apply current "effective schools" research.

The 1985-86 school year was an upbeat time for public education in Missouri. Important progress was made on several fronts, and Commissioner Mallory says "there was a tangible feeling of excitement" as schools prepared to implement the Excellence in Education Act of 1985.

Because of trends and developments such as these, 1985-86 was a year of excellent progress and optimism for public education in Missouri. There is no question that it was an "upbeat" year. For example, teachers and school officials throughout the state told me repeatedly that "it was their best year ever" because of the positive mood among students and parents.

Within the educational community, there was a tangible feeling of excitement and anticipation as schools prepared to carry out new programs authorized by the Excellence in Education Act—programs such as the career ladder, incentive grants and a new minimum salary plan for teachers.

The Excellence in Education Act, signed by Governor Ashcroft in May of 1985, established a comprehensive and ambitious agenda for school improvement in Missouri. Most of the major provisions of the new law became effective September 28, 1985. Some of the most significant elements of the law—particularly those concerning the qualifications, training and certification of prospective teachers and administrators—do not take effect until September 1, 1988.

The "big" programs created by the new law—the career ladder, the minimum salary initiative, incentive grants and others which require significant levels of funding from the state—will not begin until the 1986-87 school year. The General Assembly appropriated these start-up funds during the spring of 1986.

Because of the time required to "gear up" for these statewide initiatives, 1985-86 was devoted primarily to the development of policies and regulations

to govern the new programs. This required a major effort by the State Board of Education and the Department of Elementary and Secondary Education, which are responsible for administering virtually all provisions of the Excellence in Education Act.

To assist with this essential policy-making process, the State Board of Education appointed several advisory committees to work with state officials in drafting regulations and procedures. Under the law, the Board was required to name a 21-member advisory panel to help develop guidelines for the Incentives for School Excellence Program. However, the Board wisely elected to appoint advisory committees to work on each of the new programs.

These committees were carefully selected to assure that educators from all levels and all parts of the state would have a voice in the development of state-level policy. A conscious effort was made to include teachers, school administrators, local school board members, college and university personnel, representatives of private business, legislators, and members of the governor's staff.

The various committees began meeting during the summer of 1985, and most of them met regularly throughout the year. They have played a key role in helping Missouri get off to a smooth start with its school-reform initiatives. The ideas, policies and procedures recommended by the committees have enabled us to avoid many of the pitfalls which have hindered other states' attempts to implement major education reforms.

Programs such as the minimum salary initiative and the career ladder are complicated and potentially controversial. These measures represent *major changes* in educational policy for the State of Missouri. Therefore, it was essential that we allow for as much discussion and input as possible, from as many different groups as possible, during the early stages of policy development.

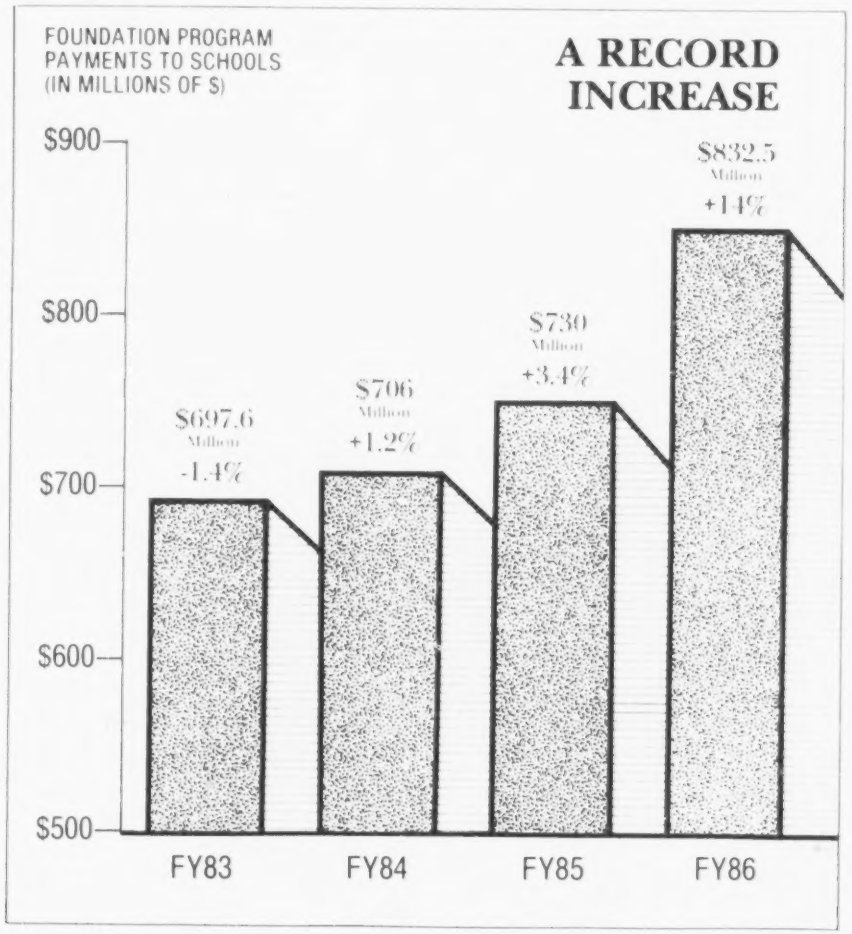
In addition to the 21-member advisory committee required for the Incentives for School Excellence Program, the State Board of Education appointed groups to work on the following programs:

- Career Ladder
- Principal-Administrator Academy
- Administrator Assessment Center
- Teacher Education Scholarships

All of these groups were appointed by the Board during June 1985. In July of 1986, the Board appointed a 34-member "Professional Development Advisory Committee" to recommend guidelines for local schools to use in meeting the Act's requirements concerning programs to assist beginning teachers and to improve local inservice training for teachers. The Department of Education also convened an informal

The Missouri Legislature approved an increase of $102.5 million in state funds for the Foundation Program during 1985-86. This represents the largest one-year dollar increase in history for the state's major source of funding for public schools. The Foundation Program provides funds for teachers' salaries, transportation, special education services, and programs for gifted students.

The 14 percent increase in state aid for 1985-86 helped compensate for lack of growth in state support during the three previous years. During 1982-83, for example, Foundation Program payments were reduced by $36 million (from the original appropriation of $733.6 million) due to state-level budget cuts. A revenue shortfall during 1983-84 forced another reduction of $5.3 million (from the appropriation of $711.3 million) in Foundation Program payments to schools.



panel of local school officials to assist in developing guidelines and procedures for carrying out the minimum salary program. (The chart on page 12 lists the various committees now working with state education officials.)

The members of these committees deserve a great deal of credit for their hard work during the past year. Even when dealing with controversial subjects, the advisory committees were able to reach consensus on policies to be recommended to the State Board of Education. This greatly simplified the Board's decision-making process and helped assure that important new policies could be implemented without major objections or resistance from the educational community.

Following is a recap of the major steps taken during 1985-86 to implement provisions of the Excellence in Education Act.

Discipline Policies

In September 1985, the State Board of Education approved guidelines to assist local school districts in developing improved discipline policies. The law requires each district to have a formal discipline policy which states the consequences for failing to obey the school's standards. Such policies must be made available to students, parents and the public. The guidelines adopted by the Board included suggestions and resources to help districts develop or revise their own policies. Districts received $100 to help implement this provision.

Evaluation of Administrators

The new law requires local school districts to conduct regular "performance based evaluations" of principals, superintendents and other administrators. This provision is similar to that included in a 1983 state law which called for performance based evaluation of classroom teachers.

In November 1985, the Board adopted recommended guidelines for schools to use in evaluating principals. Similar guidelines for the evaluation of superintendents were approved by the Board in July 1986. While districts are required to use the performance based evaluation process, they are not required to use the state-developed guidelines. The evaluation procedures for principals and superintendents were developed by the same advisory committee that created Missouri's highly successful model for teacher evaluation in 1984.

With the implementation of this state model for evaluating school administrators, Missouri became one of the first states in the nation to establish a modern and effective system for assessing the performance of ALL professional staff in public schools.

The Leadership Academy

During November 1985, the Department of Elementary and Secondary Education launched the "Leadership Academy"—actually the first state-level program to be implemented under the Excellence in Education Act. Similar to programs started recently in some other states, the Academy is designed to provide outstanding professional development opportunities for working school administrators—principals, superintendents, etc.

The Academy proved to be extremely popular with public school officials throughout the state. Its first offering was a series of workshops based on current "effective schools" research. This emphasis will continue during 1986-87 with a related series of programs on effective instruction.

The Leadership Academy is largely

1985-86 Education Statistics in Brief

Number of Public School Districts	545
Fall Enrollment	
High School Districts (K-12)	783,607
Elementary Districts (K-8)	11,500
State Total (K-12)	795,107
High School Graduates	49,204
Number of Staff	
Classroom Teachers	48,113
Principals, Assistant Principals	2,374
Superintendents	451
Asst. Superintendents & Other Central Office	808

self-supporting through fees paid by participants. It is helping to fill the need for quality inservice training among school administrators, and it will be an asset to our future school-improvement efforts.

Minimum Salary

In January 1986, the State Board of Education approved final regulations to implement the minimum salary plan established under the new law. Beginning in 1986-87, full-time teachers, counselors and librarians in public schools will be assured a minimum salary of $15,000 per year. The law calls for this minimum level to increase by $1,000 per year until 1989-90 when the state-mandated minimum will be $18,000 per year.

About 3,300 professional staff members in local schools are expected to benefit from this program during 1986-87. State funds will cover the difference between the existing base salary in local districts and the $15,000 minimum.

Some school districts and educators object to this initiative. They fear it will "compress" local salary schedules and give some teachers an "unfair" salary increase, regardless of their experience. These concerns are justified to some extent. Nonetheless, I consider the minimum salary program to be a powerful part of Missouri's overall school-improvement effort. It should have long-term benefits for schools by driving up the average salary of all teachers and by substantially improving the entry-level salary for new teachers.

The fact that minimum teachers' salaries have now been established as a matter of state policy should be viewed as a major victory by the education community in Missouri.

Tuition Reimbursement

In February 1986, the State Board adopted final rules for the state-funded tuition reimbursement program. It is intended to provide an incentive for professional educators to continue their training and professional development. The Legislature appropriated $1.8 million to support this program during 1986-87.

Under this program, teachers and school administrators can be reim-

Computer Boom

Public schools in Missouri took advantage of state matching funds during 1985-86 to buy more than 7,000 new microcomputers. More than 5,000 teachers also took part in computer-oriented training programs held during the year in conjunction with the statewide computer project.

In 1985, the General Assembly appropriated $2.5 million to help local school districts buy computers for instructional use. Of that amount, $2.4 million was allotted for 50-50 matching grants to local schools; $100,000 was reserved for teacher training workshops organized by the Department of Elementary and Secondary Education. The state funds were available only during 1985-86.

A total of 498 school districts participated in the program, spending a total of $4.6 million to buy 7,089 new computers. State education officials estimate the number of computers being used by public schools jumped at least 40 percent during the year as a result of the one-time appropriation.

JoAnne Ellis, (left) a teacher at Cassville High School, is a member of the advisory committee appointed by the State Board of Education to assist in developing recommended policies for Missouri's model career ladder plan. The Board adopted final regulations for the career ladder program during its March 1986 meeting. Ellis and other members of the advisory committee met with the Board to answer questions and discuss the potential impact of the career ladder program on local schools.

bursed for the cost of tuition for up to three credit hours in the area for which they are certificated and employed for the following year. They must earn A's and B's in their courses, however, to qualify for the tuition repayment. Courses must be taken at colleges and universities in Missouri. Reimbursement may not exceed the tuition rate at the University of Missouri. A special provision of this program allows any teacher to be reimbursed for courses related to economics.

The funding approved for this program by the General Assembly is expected to provide tuition reimbursement for more than 5,000 Missouri educators during 1986-87.

Incentive Grants

In April 1986, the Board approved final rules for the Incentives for School Excellence Program. During 1986-87, this program will provide about $4 million in state matching funds and match-free grants for innovative projects in local schools across the state. The purpose of this program is to stimulate creative ideas at the classroom level and to provide state assistance for useful projects which schools might not be able to afford otherwise.

Individual teachers, groups of teachers, individual schools and school districts may apply for the grants in separate categories. The maximum amount of the grants will range from $5,000 for an individual teacher's project up to $50,000 for a district-level project.

State funds will cover 70, 80 or 90 percent of the cost of most matching-fund projects. The local matching amount will depend on the district's relative wealth. The State Board of Education also reserved five percent of the total appropriation ($200,000) to be used for "match-free" grants. In this category, the best and most promising projects will receive full state funding.

The incentives program proved to be extremely popular. More than 1,000 applications were received during the summer of 1986, and 115 were funded for the 1986-87 school year.

Special efforts were made to allocate available funds on a geographic basis and among the different categories, in order to assure that all schools had a fair chance to win one of the competitively funded grants.

Career Ladder

In April of 1986, the State Board of Education also gave final approval to rules and regulations for the "Career Development and Teacher Excellence Plan"—better known as the "career ladder." When fully implemented, this initiative will provide annual salary supplements of up to $5,000 for teachers and other professional staff members who qualify. The career ladder is designed to provide greater recognition for outstanding teachers and to provide a financial incentive for them to remain in the classroom.

This is perhaps the most controversial aspect of the Excellence in Education Act. For example, some critics say the career ladder is actually a "merit pay system," but I do not agree with that view. It is primarily a way of encouraging teachers to improve their teaching and assume greater professional responsibility in their schools, and to provide extra recognition and rewards for such efforts.

Sixty-three school districts began career ladder programs during 1986-87. The program is voluntary for districts and individual teachers. State funds will cover from 35 to 90 percent of the cost

Test Scores Rise

Composite scores for Missouri's college-bound seniors improved in 1986 on both the Scholastic Aptitude Test (SAT) and the American College Test (ACT).

Scholastic Aptitude Test (SAT)

	Missouri	National
1982-83	976	893
1983-84	981	897
1984-85	993	900
1985-86	995	900

American College Test (ACT)

	Missouri	National
1982-83	18.5	18.3
1983-84	18.8	18.5
1984-85	18.8	18.6
1985-86	19.2	18.8

Dr. Dan L. Blackwell, a Lee's Summit orthodontist, served as president of the Missouri State Board of Education during 1985-86.

of a local career ladder program, depending on the district's relative wealth.

Under the law, local career ladder programs must consist of three steps and must be approved in advance by the Department of Education. Only "Stage I" of the career ladder will be implemented during 1986-87. Teachers who qualify for this step will be eligible for a year-end salary supplement of $1,500. In the future, "Stage II teachers" will receive a supplement of up to $3,000; "Stage III teachers" will be eligible for an annual supplement of up to $5,000.

To be eligible for the career ladder, teachers must have worked for at least five years in Missouri's public schools, and they must have at least an "effective" rating in the school district's performance based evaluation system. Each participating teacher must also develop a "career development plan," approved by the local school district, which details the teacher's responsibilities on the career ladder.

Throughout the year, I cautioned school districts not to begin a career ladder program until they were thoroughly prepared. It is not a simple program to initiate, and it may have significant financial implications for school districts in the years ahead. Because of the problems which other states have recently encountered with the career ladder concept, I was concerned about a possible "backlash" if Missouri school districts did not implement this program smoothly.

The career ladder, if used properly, can be a real plus for public schools in Missouri and for the teaching profession. I expect the number of schools taking part in this important effort to increase steadily as our experience with the career ladder concept increases.

Scholarships for Teachers

In April 1986, 210 outstanding Missouri students were chosen to receive Missouri Teacher Education Scholarships for the first time. These are $2,000 awards designed to help promising students get started in a teaching career in the public schools. During the spring of 1986, the Department of Education received more than 600 applications for the new scholarships—an excellent response for the program's first year.

High school seniors, community/junior college students, and freshmen and sophomores at four-year institutions in Missouri are eligible to apply for the program. They must rank in the upper 15 percent of their high school class or score in the upper 15 percent on the SAT, ACT or SCAT exams to qualify. Recipients are required to teach for five years in public schools within the state or the scholarship converts to a loan which must be repaid.

State funds cover half the cost of each of the one-time, $2,000 scholarships. Colleges and universities in the state support the program by providing $1,000 for each scholarship recipient they enroll. This year, 24 colleges and universities in Missouri, both public and private, participated in the program.

Even though these scholarships are not large, the new program is important because it symbolizes Missouri's commitment to improving the teaching profession. For a good future, it will be imperative that we attract some of our best young people into the teaching profession. The Teacher Education Scholarship Program is a step in the right direction, and I hope it will be expanded in the future.

Testing of Key Skills

The Excellence in Education Act establishes significant new standards for testing students in Missouri's public schools. This initiative, I believe, will have a profound impact on teaching and learning throughout the state in the years ahead.

The Act calls for a two-part testing program, beginning in 1986-87, which will measure the academic progress of students on "key skills." Criterion-referenced tests must be used by local districts and the state to assess students' progress on the state-defined key skills.

During 1985-86, the Department of Education devoted a great deal of time and energy to the development of the key skills as required by the law. Working with advisory committees which included several hundred

Advisory Committees

Hundreds of Missouri educators, school board members, political leaders and citizens are assisting in the implementation of the Excellence in Education Act by serving on various advisory committees appointed by the State Board of Education. These committees are listed below, along with the number of persons serving on each panel.

1. Core Competencies & Key Skills Oversight Committee	80
2. Subject Area Subcommittees for Key Skills (4)	120
3. Career Ladder Advisory Committee	36
4. Principal-Administrator Academy ("Leadership Academy") Advisory Committee	19
5. Incentives Advisory Committee *(required by law)*	21
6. Administrator Assessment Center Advisory Committee	23
7. Teacher Education Scholarship Advisory Committee	14
8. Professional Development Advisory Committee	34

Learning: It's A Family Affair

Nearly 16,000 Missouri families with children under the age of 3 volunteered to take part in "a quiet revolution" in education during 1985-86 the state's new early childhood parent education program. With $2.8 million in first-year state funding for the program, local school districts provided parent education and child screening services for 10 percent of the eligible families in the state. The program is extremely popular with parents, and it is considered to be the most comprehensive preschool parent education initiative in the country.

Using the "Parents as Teachers" model program as a guide, school districts provide practical information designed to help parents be more effective teachers with their infants and toddlers. Parents—like the ones shown here at the Ladue School District's Early Childhood Center—attend group meetings with other parents and take part in educational activities with their youngsters. They also receive personalized home visits from specially trained "parent educators."

teachers, professors and curriculum specialists, the Department wrote key skills for seven subject areas defined in the Act: language arts (reading, English, mathematics, science, and social studies (civics. Key skills were written for grades 2-10.

New tests for this program will be known as "Missouri Mastery and Achievement Tests" (MMAT). Under a contract with the Department of Education, new criterion-referenced instruments for this program were developed and field-tested during 1985-86 by the Missouri Testing and Evaluation Service (MTES), a branch of the University of Missouri-Columbia. This year, tests were developed for grades 3, 6, 8 and 10. During 1986-87, additional tests will be written and validated for grades 2, 4, 5, 7 and 9.

Under the law, local school districts will be required to conduct periodic testing of students' progress in the key skills. In addition, the state will conduct an annual random-sample test to measure statewide achievement trends. Districts may use the state-developed tests, write their own criterion-referenced tests, or purchase comparable commercial exams. The Department of Education must approve tests which districts buy or develop locally.

In July 1986, the State Board of Education adopted rules for this program and set technical requirements for districts that purchase commercial tests or develop their own.

Some schools across the state have objected to the key skills program because they fear it will constitute a "state curriculum." Legislators were aware of this concern as they drafted the law and have included safeguards so that the testing program will not be burdensome or disrupt local curricula.

I consider the key skills testing program an appropriate state-level effort to provide for greater accountability in education. More importantly, I believe it can be a powerful tool for improving instruction in our state. This program will certainly give us more consistent data about achievement trends than we have had in the past. Because this effort is built around criterion-referenced tests, it also will provide local schools with specific information they can use to improve instruction.

With the new key skills testing program, I believe Missouri will have one of the very best student testing initiatives in the country. The tests have been carefully constructed, with heavy input from Missouri teachers and curriculum specialists.

While the new testing program represents a change for Missouri and will no doubt cause adjustments on the part of local schools, I view this effort as a highly positive and constructive trend for our state. As they learn more about this effort, educators throughout the state—even those who have been skeptical initially—are seeing the value of this approach. The key skills program will go beyond "minimum skills testing," and Missouri schools are ready to take this important step.

(Continued on page 15)

Findings Prove 'NPAT' Helps Preschoolers and Parents

The New Parents as Teachers Project (NPAT), a pilot effort started in 1981, involved about 380 families in four Missouri school districts. It was designed to show the benefits of providing information for parents, plus screening for children, during the first three years of life.

Following are the major findings of an independent evaluation of the project. The study, released in October 1985, was conducted by Research and Training Associates of Overland Park, Kansas, under a contract with the Department of Elementary and Secondary Education.

1. NPAT children demonstrated advanced intellectual and language development.

In contrast with the comparison group and national norms, **NPAT children consistently scored significantly higher* on all measures of intelligence, achievement, auditory comprehension, verbal ability, and language ability.** The NPAT children ranked at the 75th percentile in mental processing and at the 85th percentile in school-related achievement, in contrast with the comparison group which scored at the 55th and 61st percentiles, respectively. After adjusting for preexisting differences between groups, NPAT children continued to significantly outperform comparison children on all measures. Even when 18 additional NPAT children from disadvantaged socioeconomic backgrounds were added to the sample of 75 NPAT children, these children still maintained significant differences.

2. NPAT children demonstrated significantly more aspects of positive social development than did comparison children.

NPAT children were more frequently reported by their parents as being able to distinguish a self-identity, to have positive relations with adults, and to demonstrate coping capabilities.

3. NPAT parents were more knowledgeable about child-rearing practices and child development than were comparison parents.

NPAT parents were significantly more knowledgeable than comparison group parents about the importance of physical stimuli in the child's environment, about constructive discipline, and about the developmental stages of children from birth to age three. No systematic relationships were revealed between any family background characteristics and NPAT parents' knowledge.

4. Traditional characteristics of "risk" were not related to a child's development at age 3.

Traditional measures of "risk" (parents' age and education, income, single-parent families, number of younger siblings, and the amount of alternate care received) bore little or no relationship to measures of intelligence, achievement, and language development. NPAT parents AND children performed well, **regardless of socioeconomic disadvantages and other traditional risk factors.**

5. NPAT staff were successful in identifying and intervening in "at-risk" situations.

Rather than using traditional measures of risk, NPAT staff identified children as being "at risk" by using criteria such as family stress, poor quality of parent-child interactions, and delayed language development. **These assessments were significantly and consistently related to all tested outcomes.** Children who were assessed as, and remained, at risk performed more poorly on all measures of intelligence, achievement, and language development.

The NPAT staff identified one-fourth of the participating children as potentially at risk at some point during the three-year project. In these cases, NPAT staff typically intervened by recommending that parents seek medical assistance or other specialized services. By age three, more than one-half of these risk conditions were reported corrected or improved. The results of the exit questionnaire by responding NPAT participants showed that, of those parents referred for medical or other special services, 95 percent reported receiving adequate help.

6. NPAT participation positively influenced parents' perceptions of school districts.

Participating parents were more likely to regard their school district as responsive to their children's needs than were parents of comparison group children: 53 percent of NPAT parents rated their district as "very responsive," versus 29 percent of comparison group parents.

7. NPAT parents had positive feelings about the program's usefulness.

Ninety-nine percent of the responding NPAT parents reported a high degree of satisfaction with all project services (group meetings, private home visits, screenings). Home visits were identified as the most valuable service. Ninety-seven percent of the parents felt that project services made a difference in the way they perceived their parenting role.

**Probability levels for statistical significance are commonly accepted at the .05 level. Most findings for this study were found to be significant at less than the .001 level. There is less than a one-in-a-thousand probability that differences between NPAT and comparison groups were due to chance.*

I have challenged teachers, school officials and board members throughout the state to use the key skills testing program with a positive attitude and as a tool—tailor-made for Missouri—to improve instruction. Implementing this program properly is one of the most important challenges we face as a result of the Excellence in Education Act.

Coming Soon

As stated previously, some of the most significant provisions of the Excellence in Education Act do not take effect until September 1, 1988. These changes involve certification standards for teachers; new entry- and exit-level testing requirements for prospective teachers; a mandatory "assessment" process for prospective school administrators prior to certification; and the development of new programs in local schools to assist beginning and experienced teachers.

Together, these various initiatives will have a dramatic impact on the preservice education of teachers and administrators. Because of the elimination of permanent certification for Missouri teachers (due to a 1984 state law), inservice training and professional development for educators will need to be revised and improved. Because of the new "assessment" requirements for prospective educators, colleges and universities will likely place greater emphasis on recruiting students with higher ability. Teacher training programs also will need to become more responsive to the needs and demands of local schools.

The Excellence in Education Act and other recent laws affecting the training and certification of Missouri educators have given the State Board of Education new authority to establish high-level standards and requirements. Major policy changes in these areas will need to be adopted by the Board during 1986-87 in order to allow sufficient time for teacher training programs to make needed adjustments.

The Board and staff of the Department of Education are working closely with the Missouri Advisory Council of Certification for Educators (MACCE) and other groups to assure that the new policies will be progressive and beneficial to the profession.

This whole area of activity—strengthening and renewing the teaching profession—is a major topic of debate throughout the nation. Reform proposals now being discussed at the national level also have the potential to affect policies and practices in our state in the future. Because of the pending changes outlined above, Missouri has a unique opportunity to address some long-standing problems in the education profession and to establish bold new directions for the future.

The impact of these changes, when they are implemented, will likely affect Missouri's entire educational system well into the next century. It is vital that we establish new policies which are creative, designed to enhance the professional status of teachers, and most likely to meet the changing needs of our schools and society.

Missouri Leads the Way in Early Education

One of the most exciting developments I have ever witnessed in education took place in Missouri during the past year. Without much fanfare, school districts throughout the state launched a major new effort to "begin at the beginning" in education—to work with parents and young children during the preschool years. This first, rather modest effort proved to be remarkably successful and has attracted the attention of educational and political leaders throughout the country.

During 1985-86, state funding was provided for the first time to enable school districts to provide voluntary parent education and child screening programs. These services were authorized by the Early Childhood Development Act, passed by the Missouri Legislature in 1984. A total of $2.8 million was distributed to local schools for these programs.

The new services include parent education programs for families with children from birth to age 3. Schools receive $150 for each family taking part in this aspect of the program. In addition, the statewide project provides $15 per child for educational screening of 1- and 2-year-olds. The purpose of this screening is to detect physical, mental or developmental problems which could hinder the child's growth and later learning.

Missouri's new preschool initiative is based on the resounding success of the "New Parents as Teachers" project (NPAT), a model program sponsored by the Department of Education which began in four school districts in 1981. Careful evaluation of that project clearly showed by the time children in the program reached their third birthday they were substantially ahead of other children in overall development—particularly in the area of school-related skills. When these findings were announced in October 1985, the project was featured in the *New York Times* and by other national media. Subsequently, Missouri received literally thousands of requests for information about the program. (See NPAT evaluation results on page 14.)

During 1985-86, nearly 16,000 families with children under the age of 3 took part in the new program, and 14,000 children (1- and 2-year-olds) were screened. Because of the success and popularity of this effort, we hope this participation level can double during 1986-87, and the State Board of Education requested sufficient funding to meet that target.

This preschool initiative, which is providing an example for other states to follow, could have an enormously positive impact on our school system in the years ahead. By helping parents do a better job in "teaching" their children at home during the preschool years, and by preventing many of the common problems which interfere with optimal development, Missouri should have thousands of children who will be more successful when they begin their formal schooling.

Missouri is making a major commitment to this program by providing new funds and by emphasizing the need for thorough training of "parent educators"—the personnel who work directly with parents and children in local districts.

For nearly 15 years, the State Board of Education and I have been advocating expanded preschool services in public schools. It is gratifying to see this long-term interest paying off so handsomely for children, parents and schools throughout the state. This effort may well be the "best kept secret" in the whole field of school reform today, and I believe it could have the most profound and positive impact of all the school-reform measures now being implemented in our state.

All Missourians should be proud of the "Parents as Teachers" initiative!

Missouri Supports Reform

During the fall of 1985, the Department of Education sponsored its annual "Regional Educational Conferences" at 10 locations across the state. The theme of the meetings was "Excellence in Education: Challenges & Opportunities." The goal of the conferences was to help Missourians understand the scope and potential impact of the Excellence in Education Act. More than 5,000 citizens and educators took part in the meetings.

Conference participants learned about the various provisions of the Act and had an opportunity to discuss the implications of the law for their own schools and communities.

Overall, conference participants voiced strong support for the goals and themes included in the Excellence in Education Act. For example, while most of the major provisions of the Act are voluntary for local districts, a strong majority of the Regional Conference participants said the Act would be "very important" or "somewhat important" in their own communities.

Teachers, school officials, school board members and parents have different perceptions about the most pressing needs in their schools and often disagree about specific school-reform ideas. The views expressed at the Regional Educational Conferences, though, showed that Missourians see the need for school reform and endorse the new direction our state is now taking. This is an encouraging sign for the future.

A Positive Outlook on Education in Missouri

During the Regional Conferences, I told participants that education in Missouri was "at an all-time high" because of the enactment of a sweeping school reform law, the healthy increase in state financial support for public schools, and the prospects for positive change in the future. I am pleased to say most Missourians seem to share my optimism.

A respected public opinion survey, conducted during the summer of 1985 by the Centerre-Missourinet Poll, showed that an overwhelming majority of Missouri citizens are satisfied with the quality of public education in our state—and optimistic that the quality of our schools will improve further in the future.

The poll was based on telephone interviews with 503 citizens. Of those respondents with school-age children, a total of 93 percent said they were "very satisfied" (52%) or "somewhat satisfied" (41%) with the education their children receive.

"These results," said the Missourinet's analysis, "held true in all areas of the state and were about the same among parents of children in both public and private schools." I think this finding is particularly noteworthy; it indicates that favorable attitudes about education are consistent throughout the state.

The survey results were encouraging in other respects. For example, 84 percent said they believe teachers are doing a good job, and 51 percent "strongly support" the idea of raising teachers' salaries.

It is nearly impossible to overestimate the value of this type of positive public attitude. Without public support, our schools can hope to achieve very little in the way of real and lasting reform or improvement. Coupled with the current mood of optimism and excitement within the educational community, however, the high level of public confidence reflected in this poll indicates that Missouri should be able to achieve virtually any goal we set for ourselves in the area of school improvement.

I am a firm believer in the self-fulfilling prophecy. If Missourians agree that changes are needed in our school system and believe that we can bring about those changes, I don't see how we can fail.

What's Ahead?

In preparing this report, I have been reflecting on why Missouri was able to make as much progress and achieve as many milestones as we did during the past year. I was reminded, of course, that we did not accomplish all these good things in one year. While we may look back with pride on what was achieved during 1985-86, we must remember that the job is not finished.

In 1983, the National Commission on Excellence in Education published *A Nation at Risk*, the report that really triggered the current school-reform movement across our country. Two years later, in the spring of 1985, the General Assembly adopted the Excellence in Education Act—the step which accelerated Missouri's "homegrown" school reform campaign. Today, while we are implementing major portions of the new law, we are still looking two or three years into the future and anticipating the effects of all of the law's provisions.

Educators, political leaders and concerned citizens spent nearly 15 years working on the ideas behind our pioneering early childhood parent education program—ideas that finally paid off this year with a headline in the *New York Times*. By the time the Excellence in Education Act is fully implemented, we will have spent at least four full years planning, preparing and working to assure that everything "works out."

But look at the rewards we are beginning to claim!

Missouri's educational system *IS* at an all-time high—but not at the peak. A great deal has been done, and we should be proud of what has been accomplished. And while much more work remains, the momentum is in our favor. I am proud to be a part of Missouri's public education system today and optimistic about what the future holds for the children and youth of our state. □

The "Blue Book" Highlights Public Schools

The 1985-86 *Official Manual of the State of Missouri* (the familiar "Blue Book") featured a major article about public education in the state. The 15-page article—"New Times, New Challenges for Missouri's Public Schools"—traced the development of public education in the Show-Me State and reviewed current trends affecting education. The article was written by Jim Morris, public information director for the Department of Elementary and Secondary Education.

HIGHLIGHTS OF 1985-86

Eight Elementary Schools Earn National Honors

Eight Missouri elementary schools were honored this year in the U.S. Department of Education's first national Elementary School Recognition Program. Among the 210 winners nationwide were:

- Fairview Elementary School, Columbia School District
- John Ridgeway Elementary School, Columbia School District
- Mason Ridge Elementary School, Parkway School District
- Highcroft Ridge Elementary School, Parkway School District
- Thomas B. Chinn Elementary School, Park Hill School District
- Jackson Park Elementary School, University City School District
- Monett Elementary School, Monett School District
- Meramec Elementary School, Clayton School District

The nationwide recognition program for elementary schools is an outgrowth of a similar program begun by the U.S. Department of Education in 1983 to focus attention on outstanding high schools. Beginning this year, the Education Department will conduct the elementary and secondary recognition programs in alternate years.

Under federal guidelines, Missouri was eligible to nominate 11 schools for the program. A committee of elementary principals and Department of Education staff reviewed applications from 47 schools before selecting the state's candidates. Winners were named after federal education officials selected national finalists and the schools were visited by outside evaluators.

Schools applying for the recognition program submitted an 18-page application describing their schools and providing data about student achievement, school policies and instructional methods. The schools were evaluated on the basis of academic performance, quality of discipline, evidence of high expectations and standards, parent and community involvement, recent school-improvement activities, administrative leadership and other factors.

Enrollment Up for First Time in 13 Years

After declining steadily for the past 13 years, enrollment in Missouri's public schools increased slightly in the fall of 1985. In September, Missouri's 545 public school districts reported a total enrollment of 795,107 in kindergarten through grade 12—an increase of 1,314 students over the September 1984 enrollment of 793,793.

While far from an enrollment "boom," the increase surprised state officials who had projected another slight decline.

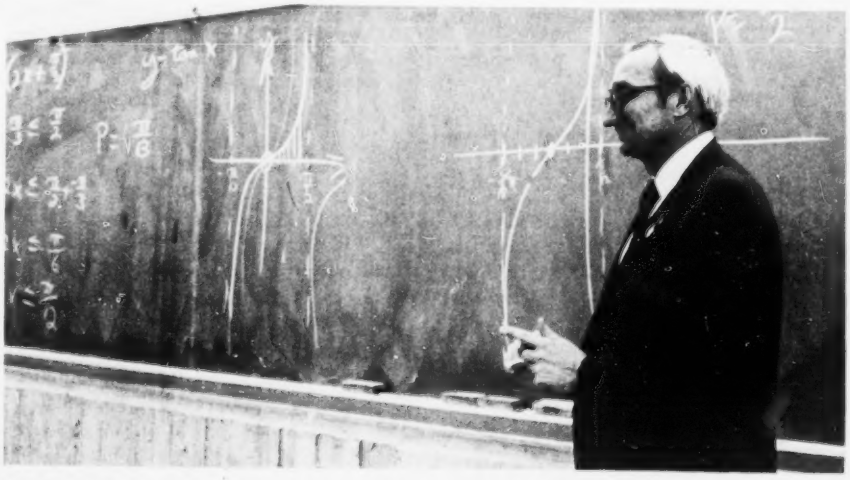
"We expect the number of students enrolled in our public schools to hover around 800,000 for the next two or three years. Unless there is a significant change in the number of people moving to Missouri or an increase in the birth rate, we are not looking for a significant increase in enrollment in the near future," noted Commissioner Mallory.

Public school enrollment in Missouri peaked at 1,007,824 during the 1972-73 school year.

More Grads Receive College Prep Certificate

More than 3,000 of Missouri's 1986 public high school graduates earned special recognition from the State Board of Education for their academic achievement. These seniors qualified for the College Preparatory Studies Certificate, a special award created by the Board in 1985 to recognize students who complete a rigorous course of studies in high school.

Response to the certificate program increased substantially this year. In 1985, 2,026 certificates were issued for



Dennis Preis, a mathematics and computer science instructor at Parkway South High School, was named Missouri Teacher of the Year for 1985-86. A teacher for 20 years, Preis has worked to incorporate microcomputers and computer science into the math curriculum. He believes in teaching the "three R's"—respect, responsibility and rationality—along with his subject matter.

presentation during graduation ceremonies at 248 high schools across the state. In 1986, 3,136 certificates were requested by local districts for students at 291 high schools.

To qualify for the certificate, students must have earned at least 24 units of high school credit. They must have a "B" average (3.0) in the basic academic subjects (English, math, science and social studies) and take certain required courses in these areas. In addition, students must have scored above the national average on a college-entry exam.

Shaping the Future of Agricultural Education

The Department of Elementary and Secondary Education convened the state's first Agricultural Education Conference on Nov. 5-6, 1985. More than 200 educators, legislators, farmers and agribusiness leaders gathered in Columbia to study and discuss the future of agricultural education in Missouri's public schools. The conference theme was "Shaping the Future of Agricultural Education."

Conference participants reviewed issues facing the troubled agriculture industry today; examined the status of agricultural education in the schools; and helped identify goals for agricultural education into the 1990s. They accepted a challenge from Commissioner Mallory to look for ways to help all Missouri students understand the state's biggest industry and to ensure the schools are adequately preparing those who choose careers in agriculture.

Ideas generated at the conference became the basis of "Recommendations for Excellence" which were formally presented to the State Board of Education in June 1986. Many of the recommendations are already being implemented.

Missouri's planning process is considered unique nationwide and is being used as a model by other states interested in strengthening their agricultural education programs, said Dr. Terry Heiman, director of agricultural education for the Department.

Poster Commemorates "Teacher in Space"

The Department of Elementary and Secondary Education produced a special poster (left) as a tribute to America's first "Teacher in Space," Christa McAuliffe, and the crew of the space shuttle Challenger, who died Jan. 28, 1986.

The 17-by-22-inch, full-color poster features portraits of the crew members and this quote from Christa McAuliffe: "May your future be limited only by your dreams."

The poster was developed jointly with the Missouri School Public Relations Association (MoSPRA) and *The Kansas City Star*. Jerry Hirt, an artist with the Kansas City Star Co., donated original art for the poster. MoSPRA provided funds for the project, and the poster was printed by the School for the Deaf in Fulton.

The Department distributed copies of the poster throughout the country and provided all Missouri school districts with enough free copies of the poster for each school building.

Moving in at the Scholars Academy

Scott Murphy (center), a student at Hickman High School in Columbia, didn't have far to travel to the 1986 Missouri Scholars Academy. He also had plenty of help moving into his University of Missouri-Columbia residence hall when he arrived. Lending Scott and the other students a hand was Academy faculty member Louis Jobst (right).

More than 300 gifted high school students, all between their sophomore and junior years, attended the three-week residential program June 14-July 4, 1986. Held for the first time in 1985, the Academy is directed by the State Board of Education and the Department of Education with funds provided by the Missouri Legislature. The University hosts the program and provides classroom facilities, student housing and other resources. Public and private high school students are selected to attend the Academy, which is designed to provide a highly challenging "community of learning."

Gifted Education Program Enjoys Steady Growth

The number of school districts taking part in the state-supported gifted education program continued to grow during the 1985-86 school year. A total of 162 public school districts participated in the state-assisted program for gifted children; 30 districts were involved for the first time this year.

State funding for gifted education programs has nearly doubled over the past five years. The 162 districts participating in the program during 1985-86 received an estimated $5 million in state funds to provide specialized instruction for nearly 13,500 students. Five years ago, during 1981-82, 79 districts participated in the program and received approximately $2.6 million in state funds.

"There clearly is a growing interest across Missouri in serving our gifted children and youth more effectively. Parents are demanding special programs for their gifted children, and the schools are responding," said Bob Roach, director of gifted education programs for the Department of Elementary and Secondary Education.

During the past few years, Roach said, the number of school districts participating in the state-assisted gifted program has been increasing about 20 percent annually. Despite this steady growth, though, Roach estimated that only about one-third of the eligible children in Missouri are now being served in a state-approved gifted class or program.

Efforts to expand services for gifted students include the Missouri Scholars Academy, held for the first time in 1985 with funding from the legislature. The three-week residential program serves 300 gifted students from public and private high schools throughout the state.

The State Board of Education also is considering a new policy which would require school districts to identify and appropriately serve gifted children at all grade levels in order to qualify for the state's "AAA" or "AA" rating.

Grand New Flag Flies for Education

On July 4, 1985, Missouri education officials and their counterparts in all 50 states raised a new flag that symbolizes the importance of education in a democracy.

The "Flag of Learning and Liberty" was raised at 12:51 p.m. at the Capitol by a parent, a student and a teacher from the Jefferson City Public Schools. Commissioner of Education Arthur L. Mallory led the special ceremony, timed to coincide with one scheduled for 1:51 p.m. (EDT) in Washington, D.C. The time signified "one nation, 50 states, one commitment to quality education as a cornerstone of democracy."

The Flag of Learning and Liberty (shown below) was developed by the National School Public Relations Association (NSPRA), which coordinated the nationwide flag-raising as part of the organization's 50th anniversary celebration. With financial support from the Southland Corporation of Dallas, NSPRA produced 60 first-edition flags for the July 4 ceremonies.

The new flag, which symbolizes education with gold flames and incorporates the red, white and blue of the "Stars and Stripes," is distributed by NSPRA and is now being displayed by schools throughout the nation. The Missouri chapter of NSPRA donated the "first edition" flag which flew over the Capitol on July 4; it is now displayed permanently in the headquarters of the Department of Elementary and Secondary Education.

"Throughout our history, America has rallied to her flag. Perhaps this new flag will rally public support for efforts to improve teaching and learning here in Missouri," Commissioner Mallory said. "I hope that every school in the state will fly this beautiful new flag along with the 'Stars and Stripes.' As we pledge allegiance to our national flag, we can renew our commitment to excellence in education and salute the vital role our schools play in teaching good citizenship and the values of our free society."

Academy Focuses on "Effective Schools"

William Daly, an elementary principal in the Ralls Co. R-II School District, was among the first group of public school officials to participate in Missouri's "Leadership Academy," held Nov. 19-20, 1985, at Jefferson City. The workshop was the first in a series of four programs offered during the year to help principals understand and apply the latest research about "effective schools." The Academy's first session (left) drew a capacity crowd of 130 school officials, and an equal number were put on a waiting list for enrollment.

Created by the Excellence in Education Act of 1985, the Academy is designed to improve education by providing high-quality professional development activities for principals, superintendents and other school administrators. The Academy is conducted by the Department of Elementary and Secondary Education. The first year of the Academy was a big success, with nearly 1,200 local school administrators taking part in the effective schools series. The Academy's faculty includes educational leaders from across the nation, as well as experienced Missouri educators.

The Leadership Academy is now offering sessions at sites throughout the state in order to make the programs more convenient for school administrators. In addition, the Academy is developing a "catalog" of workshops on different topics.

TABLE 37

SUMMARY OF COURSES OFFERED IN SUBJECT MATTER FIELDS

Number of Course Titles: There is a listing of course titles for each major area published each year (see Table 36). This number is the aggregate of that listing by area.

Duplicated Count of Students: If a student is enrolled in more than one course in a major area, the student will be counted for each course.

Percent of 9-12 Students Enrolled: This is a ratio of students enrolled in the major areas divided by fall state enrollment for 9-12 grades. The comparison of years shows activities of areas.

Year	# of Course Titles	Duplicated Count of Students	% of 9-12 Fall Enrollment
Agriculture			
85-86	30	20,325	8.1
84-85	29	20,674	8.3
83-84	28	22,793	9.1

Sub-totals	107,203	9,602.25	78,996,833
Homebound/Contractual Services	**436		349,096
Minus Remedial Reading*		-1,170.50	-7,953,605
Totals	107,639	8,431.75	$71,392,324

* Effective FY 1982, Remedial Reading no longer administered by the Special Education Section.
x NOTE: The School Foundation Program was funded at 99.89150452% during 1985-86. The above figures do not reflect the reduction in funding.
** Figure represents full time equivalents based on $800 maximum allowed per child.

b. State Schools for Severely Handicapped –Statistical Summary

Attendance Schools	Aggregate Days Membership	Days in Session	A D M	Total Days Attendance	A D A	Number Pupils Transported
54	393,102.5	174	2,259.2	348,245	2,001.4	2,297

c. Sheltered Workshops—Statistical Summary

Number of Workshops	Number of Handicapped Workers	Total Wages	Average Hourly Wage	Total State Aid Paid to Workshop
81	5,309	$7,008,377.97	.96	$6,669,360

C. MISSOURI SCHOOL TRUST FUNDS

Section 162.790 (5) RSMo. authorizes the State Board of Education to accept grants, gifts, donations, or bequests for the use of the Missouri Schools for the Blind, for the Deaf, and for the Handicapped Children to deposit same in the Schools' Trust Fund in the State Treasury, or to invest such funds in stocks, bonds, deeds of trust, or any other investment securities in the amounts and in the proportions that the State Board of Education prudently selects.

The act further provides that "moneys in the School for the Blind Trust Fund or in the School for the Deaf Trust Fund or the School for the Handicapped Children Trust Fund shall not be appropriated for the support of the schools in lieu of general state revenues but shall be appropriated only for the purpose of carrying out the object for which the grant, gift, donation, devise or bequest was made," as recommended by the State Board of Education.

Total Fund Balance		**$113,441.95**

*Restricted as follows: $3,790.05 — Maple Valley State School, gift of Gladstone Fraternal Order of Police. $20,275.80 — B.W. Sheperd State School, gifts from Adele S. Holt Estate ($6,082.74), James Lynn Estate ($2,635.85) and Peppin Estate ($11,557.21). $1,322.46 State School No. 18, gift from Rosa B. Clark Estate. $3,404.43 — Mapaville State School, gift from Ernest Rabenort Estate.

d. HANDICAPPED CHILDREN TRUST FUND
ANALYSIS OF CHANGES IN FUND BALANCE
July 1, 1985—June 30, 1986

Balance, July, 1985		$98,997.88
Add:		
Interest Received	$11,719.89	
Cash Gifts—Estates	3,404.43	
Gain on Sale	16.20	15,140.52
Less:		
Bank Fees	$696.45	696.45
Fund Balance, June 30, 1986		$113,441.95

e. SCHOOL FOR THE BLIND TRUST FUND
BALANCE SHEET
June 30, 1986

Assets		
Cash in bank—Boatmen's National Bank of St. Louis		9,745.46
Cash in bank—State Treasury		3,804.91
Investments:		
Variable Interest Notes	$668,000.00	
Government Bonds (M/V—$2,005,284.82)	1,880,960.52	
Corporate Bonds (M/V—$506,300.00)	540,768.75	
Common Stock (M/V—$1,897,219.48	682,520.20	
Total Investments		3,772,249.47
Furniture, Fixtures and Equipment		308,325.92
Land and Buildings, Recorded at Cost		638,946.48
Total Assets		$4,733,072.24
Fund Balance		
Restricted Fund Balance*		$20,000.00
Unrestricted-Fund Balance		4,713,072.24
		$4,733,072.24

*Restricted as follows: To assist graduated in starting life on self-supporting basis. Gift from Eula E. Reynard Estate.

f. SCHOOL FOR THE BLIND TRUST FUND
ANALYSIS OF CHANGES IN FUND BALANCE
July 1, 1985—June 30, 1986

Balance, July 1, 1985		$4,414,115.88
Add:		
Cash Dividends	$59,491.41	
Interest Received	323,430.53	
Cash Gifts—Estates	113,426.64	
Stock Gifts—Estates	0.00	
Gain on Sale—Investments, Land & Building	439.34	496,787.92
Less:		
Loss on Sale—Investments, Land & Building	0.00	
Bank Fees	11,500.30	
Office Supplies	1,875.83	
Repair & Maintenance	7,924.16	
Therapeutic Expense	87,457.77	
Instructional Expense	68,957.52	
Miscellaneous Expense	115.98	177,821.56
Fund Balance, June 30, 1986		$4,733,072.24

TABLE 41
VOCATIONAL REHABILITATION

A. Summary Data for Year Ending September 30, 1986

Persons Served and Rehabilitated		Average Cost	
Served	Rehabilitated	Per Case Served	Per Case Rehabilitated
35,419	5,432	$868.14	$5,660.63
19,312*		$1,592.20*	

*Denotes active cases only. Prior to Fiscal Year 1985, total cases served were required to be reported to the federal government.

B. Services and Cost to the 5,432 Clients Rehabilitated

Services	Number of Clients with Cost	Total Cost*
All Services*	5,113	$11,710,471

*The costs represent only amounts spent for services purchased by the agency. Some services have been obtained free of charge or may have been paid for, wholly or in part, by other organizations, interested individuals or by the client himself. Excludes cost of administration, counseling, guidance and placement.

C. Jobs After Rehabilitation

Professional, Technical & Managerial Occupations	838
Clerical and Sales Occupations	889
Service Occupations	1,307
Farming, Fishery, Forestry, & Related Occupations	125
Industrial Occupations	1,099
Work in Sheltered Workshops	872
Homemakers (own home) and Other Unpaid Family Workers (own home)	302
Total	5,432

D. Earnings at Referral and at Closure to 5,432 Rehabilitants

Weekly Earnings at Referral	Number of Rehabilitants	Weekly Earnings at Closure	Number of Rehabilitants
None	4,565	None	327
$01-19	38	$01-19	475
$20-39	80	$20-39	379
$40-59	90	$40-59	221
$60-79	101	$60-79	248
$80-99	68	$80-99	204
$100 plus	490	$100 plus	3,578

Average weekly earnings at referral	$18
Average weekly earnings at closure	$140
Increase in average weekly earnings	$122*

*With an increase in average weekly earnings of $122 for the 5,432 rehabilitants, the total increase in earnings would amount to $34,460,608.

E. Disability Determinations Section processed 50,577 cases during the fiscal year 1986.

TABLE 42
TESTING AND ASSESSMENT
PROGRAM DATA

A. Summary of 1985-86 BEST Test

BEST	Percent Passing Test
Reading	96.2
Math	86.9
Government/Economics	88.8
All Three Subtests	79.8

Passing Criteria: At least 1 of 3 items correct on each of the 13 objectives and at least 75 percent of the subtest items correct.
Testing Dates: March 1-15, 1986
Number of eighth graders included in this analysis—48,530
Total number of eighth grade students—61,456

B. Scholastic Aptitude Test Scores

	Verbal		Math
